My name is Jason Kelvin, for over 25 years I have worked as an artist and designer across many areas building a wealth of experience.

I am a highly creative and practical person who brings a large range of skills to a project.

I'm frequently asked to look at projects where people have come up against practical, budget and aesthetic stumbling blocks and thrive on the challenge of solving these.

I thrive working on a range of projects including TV drama , Feature films commercials and music videos.

Over the last few years I have worked on several award winning short films and adverts bringing high production values with often challenging budgets.

I'm passionate about nurturing and training people in the art department encouraging diversity and promoting best practice, giving people the time and space to learn - as our industry grows people need support and mentoring to ensure safe and creative environments .
